

Pump Series MWP2

Typical characteristics

- **Robust design** in cast wear resistant duplex materials
- Open impeller, non-clogging
- **Close coupled**, very compact
- Built from standard components
- **Electrolytically polished**, high corrosion resistance

Technical data

Max. flow	50 m ³ /h
Max. head	6 bar
Max. product viscosity	500 cP
Motor power up to	11 kW

Applications

The pumps of the MWP2 series are ideal for pumping **erosive / abrasive products**. Typical applications are found in the brewing world but also in bioethanol industry and animal feed.

Typical liquids include diatomaceous earth, liquid pig and calf feeding etc.
