

Pump series MSP2

Typical characteristics

- Robust execution in cast stainless steel 316L
- Open impeller
- **Close coupled**, very compact
- Built from standard components.
- **Electrolytically polished**, high corrosion resistance.

Technical data

Max. flow	70 m ³ /h
Max. HMT	3 bar
Motor power up to	11 kW

Applications

The pumps of the MSP2 series are self-priming pumps and mainly used to suck up liquids from lower placed vessels or a basement. They are also useful as **CIP return** pump, as well as for **truck unloading**. They are also ideal for pumping air containing liquid.
