

## Pump series ICP1

### Typical characteristics

- The best '**value for money**' industrial stainless steel centrifugal pump
- **Energy efficient** with high efficiency
- Modular concept built up with standard components
- **Easy maintenance**

### Typical applications

Max. flow	55 m <sup>3</sup> /h
Max. head	2,7 bar
Max. product viscosity	500 cP
Max. motor power	5,5 kW

### Typical applications

The Packo pumps of the ICP series are mainly used for pumping clean as well as slightly polluted liquids. You will find them in just about all industries such as vegetable industry, brewery world, water treatment and textile industries as well as in for example biogas, biodiesel and bioethanol applications.

**Typical liquids are:** CIP fluids, process water and contaminated water, glycols, solvents, alcohols, and chemicals.
