

Pump series FMS

Typical characteristics

- **Hygienic** executed multistage pump.
- Ideal for operation at **moderate flow rate** and **high pressures**.
- High efficiency, **energy saving**.
- **Low NPSH value!**
- Electropolished so **higher corrosion resistance** and **easier to clean**.

Technical data

Max. flow	50 m ³ /h
Max. head	16 bar
Max. product viscosity	250 cP
Motor power up to	45 kW

Applications:

The hygienically executed Packo multistage pumps from the FMS series are used as process pump in the most diverse applications in food (milk, beer, soft drinks, ...), pharmaceutical and chemical industries and this for food, beverages, medicines, lotions, etc.

Typical applications are found in filtration, pasteurization, filling machines, high pressure CIP systems, process pump for plate heat exchangers, etc.

Performance Pump series FMS
